高级有机肥料

あじみの肥丹 AJIMINO

AJIMINO is a uniquely scented organic fertilizer. It releases coffee-like aroma, which is pleasant and soothing to smell. With **AJIMINO**, commercial and home planters will not need to worry about foul smell anymore.

Enriched with Amino Acid, Humic Acid and Fulvic Acid, the optimum **AJIMINO** formulation is designed to help increase crops yield by 20-30% with regular use. On top of vitamins and minerals, **AJIMINO** contains more than 20% of N.P.K and trace elements, which is the highest among its category.

Because of its organic nature, using **AJIMINO** will protect soils from being acidic. Besides, it helps to improve soil quality and soil structure.

AJIMINO 是一项特制的清香有机肥料。它散发出类似咖啡的芳香，气味清新，味道绝不刺鼻。无论是大规模种植的农业生产或是家居园艺，采用 **AJIMINO** 便无需再担忧闻到刺鼻的肥料气味。

AJIMINO 富含氨基酸、腐植酸和富里酸，并以最佳的配方进行配制，定期施浇 **AJIMINO** 肥料，有助提高农作物的产量20-30%。除了含有微量元素和矿物质，**AJIMINO** 所含的碳磷钾也比同类肥料高出20%。

AJIMINO 的有机性质，使之能够保护土壤避免酸化，同时有助改良土壤的品质与结构。

TECHNOLOGY

科技

Trusted by many commercial plantations, **AJIMINO** is made from starch and molasses through a modern microbiological fermentation technology.

AJIMINO 以高品质的汤米与淀粉等糖源作为原料，运用先进尖端的微生物发酵培养科技生产而成，备受大型种植公司所信赖。

BENEFITS OF USING AJIMINO

采用AJIMINO之好处

- Increase crops yield by 20-30%
- Its coffee-like fragrant is pleasant and soothing to smell
- Helps pollen tube to grow longer, increasing fruiting
- Regulate pH value of soils and improve soil quality
- Increase nutrients uptake
- Improve crops resistance towards diseases and harsh environment

- 增加农产品产量高达20-30%
- 类似咖啡的芳香，气味清新，绝不刺鼻
- 刺激花粉管增加伸长，增加产量
- 平衡土壤的pH值，改良土壤的品质
- 提高养分吸收
- 提高植物的抗逆性，减少病虫害和对抗恶劣的环境

UNIQUE ADVANTAGES

独特的优势

- Enriched with Amino Acid, Humic Acid & Fulvic Acid
- 富含氨基酸、腐植酸和富里酸

AMINO ACID 氨基酸

AJIMINO is enriched with Amino Acid, which is absent in chemical fertilizers. Amino acid is an essential molecule to form proteins, which is required for all stages of growth.

AJIMINO 富含氨基酸，这是化学肥料所没有的。氨基酸是构建细胞（蛋白质）的基本分子，因此植物在任何一个成长阶段都需要氨基酸。

THE FUNCTIONS OF AMINO ACID INCLUDES: 氨基酸的功能包括

- Improve opening of stoma and photosynthesis, supporting crops to grow larger and greener
- Help pollen tube to grow longer, increasing fruiting
- Chelating effect helps to carry minerals and trace elements efficiently, improving nutrients uptakes
- Improve soil structure and fertility
- 改善植物气孔的伸张作用和光合作用，植物长得更茁壮和茂盛
- 刺激花粉管增加伸长，增加产量
- 具有螯合金属离子的作用，有效地运输植物所需的微量元素，提高养分吸收
- 改良土壤的结构，加强土地的肥沃度

02

HUMIC ACID 腐植酸

Another valuable ingredient of **AJIMINO** is Humic Acid. It physically improves aeration of soil and water retention. It chemically regulates pH value of soils, increases uptake of minerals and trace elements through chelating effect. Biologically, it stimulates plant enzymes and increase production.

AJIMINO 其中一种珍贵的成分为腐植酸。在物理学上，它有助改善土壤的通透性和保水性。在化学上，它有助调节土壤的 pH 值，有效地运输植物所需的微量元素，提高养分吸收。在生物学上，它刺激植物酵素，提高产量。

03

FULVIC ACID 富里酸

Fulvic acid and humic acid are natural and organic molecules, which are the final breakdown from the natural decay of plants and animals.

富里酸和腐植酸皆是由动、植物天然腐烂形成的腐殖质，属于天然有机分子。

FUNCTIONS: 功能

- Increase availability of soil nutrients
- Enhance uptake of nutrients
- Improve the development of roots and shoots
- Chelating effect
- Increase crops yield

- 加强土壤中的有效养分
- 强化养分吸收
- 促进植物根部和嫩芽成长
- 螯合作用
- 增加农作物产量

Product Specifications 产品规格

Total Organic Matter 有机质	> 80%
NPK + TE 氮磷钾 + 微量元素	> 20%
Amino + Humid Acid 氨基酸 + 腐殖酸	> 30% - 35%
C/N Ratio 碳氮比	< 8:1
Colour 颜色	Dark Brown 深棕色
Shape 形状	Granular 圆球形
Moisture 水分	< 3%

Recommended Application Rates 建议施肥率

Crop 农作物	Rate 施肥率	Application 应用
Vegetables 蔬菜	1500 - 2500 kg/ha 公斤 / 公顷	Use as basal and top dressing 用于底肥和追肥
Fruit Trees 果树	5 - 10 kg/tree 公斤 / 树	Apply after the fruit harvest and after fruiting 结果后及开花后
Oil Palm & Rubber Seedling 油棕数秒及橡胶树苗	20 gm/tree 克 / 苗	Alternative month 每隔一个月
Mature Oil Palm 成熟油棕树	2 - 4 kg/tree 公斤 / 树	Every 6 month 每隔六个月
Mature Rubber Tree 成熟橡胶树	200 - 250 kg/ha 公斤 / 公顷	Every 6 month 每隔六个月
Paddy 稻米	750 - 1000 kg/ha 公斤 / 公顷	Broadcast after seedling 在播种后撒下
